Water-Jet Cleaning System for Brass Instruments

for Tuba

Hydro-Jet M1

Water-Jet Cleaning System for Brass Instruments
8 mm x 2.500 mm (diameter x length)

The Hydro-Jet M1 allows you to safely, and effectively clean your instrument with the concentrated power of water. The long and highly flexible cleaning hose is fitted with a special spray nozzle that provides six highly focused and powerful jets of water to blast away accumulated foreign matter. Even the most difficult-to-reach parts of your instrument are easily cleaned by the Hydro-Jet M1.

The Hydro-Jet M1 is very easy to use. It is conveniently fitted with a 1/2" thread that will attach to any standard shower hose - simply replace the hand-held shower head with the Hydro-Jet M1, and within minutes you will be powering away contaminants from deep inside your instrument.

1. Detach the hand-held shower head from the shower hose.

2. Attach the Hydro-Jet M1 to the shower hose and tighten securely.

3. Insert the blue cleaning flexible hose into your instrument. You may insert the flexible hose via the mouthpiece receiver or the bell. You may also detach the slides and clean them separately.

4. Turn on the water and adjust the temperature as desired. The innovative nozzle technology delivers highly focused and powerful jets of water for quick and easy cleaning of your instrument.

5. Slowly move the flexible hose through each part of the instrument allowing the Hydro-Jet to work its magic.
